DIY TOPPERS

Super fast, super easy, instant support!

A little edible cake decorators' glue and your favourite fondant to transform an acrylic topper into whatever you fancy.

The acrylic provides instant support – no hours needed for your fondant to dry.

Match the colour perfectly to your cake.

Best of all, when the celebrations are finished peel off the fondant, then hand wash your acrylic topper in warm soapy water to reuse again, over and over!

INSTRUCTIONS: Apply edible glue to the acrylic topper, roll out fondant and place on the topper, glue side to fondant, flip over and use the edge of the topper as a handy cutting guide. Flip back over and have fun decorating.

No need to cover the entire surface with fondant. You can simply cut a few shapes to transform your DIY topper instantly.

Match the colour on the topper to your cake by using the same fondant or go crazy with as much coordinated decoration as you want.

Use the same topper to create different looks. This snowman shape can be used to make a snowman or a teddy bear or a bunny rabbit... the possibilities are endless!

Top Tips for these templates:

- Use these templates as a guide only. All of our basic shapes are designed to allow your imagination to run wild.
- Feel free to alter shapes to suit your own designs.
- Cutters come in handy so think how to use them in different ways. For example we used a daisy cutter for the feet on the chicken template.
- Add tylose or similar, to pieces that extend past the edge of the acrylic topper.
- Experiment with other techniques like stencilling or painting with edible colours.
- **Have fun and be sure to post your creations to social media, tag us and we'll share.**
